Subject: EER Incident: Fishkill near Bridgeton Landfill

140226-1330-PAH
St. Louis

Joe Trunko with the St. Louis Regional Office is reporting the Attorney General asked the St. Louis Regional Office and a member of EER to observe a fish kill which was reported to the Environmental Protection Agency Region-7 by a private citizen via email on 2/24. It is located at 4080 Wedgeway Court in Earth City. According to the email

string, EPA forwarded the message to the Missouri Department of Conservation (MDC). MDC determined that based on the time of year, and location within the flood plain, the fish kill was most likely natural.

Because of the proximity to the landfill (less than one mile away) and the site was reportedly not actually visited by MDC, Mike Ruddy, Environmental Emergency Response State On-Scene Coordinator currently located at the Bridgeton Landfill, is going over to the location immediately to determine if the fish kill could in any way be related to the Bridgeton Landfill.

Update: 1423 Hours: Mike Ruddy reported that the lake has receded about five feet and is frozen. Paul Mueller (St. Louis Satellite Office, Lincoln Co.) is also on scene.

For additional information about this or any other incident, please reply to this email or contact the duty officer at 573-634-2436.
